

# NEVER, NEVER, NEVER STOP.

Know your enemy. In the war on pathogens there are many fronts and we know that your most powerful tool is knowledge. The Front Line internal audit score sheets and training presentations are powerful tools for you to use to prioritize and fix problems. And our **RED FLAGS** program identifies sanitation and food safety risks that we must train ourselves and team members to recognize so we can take corrective actions. The **RED FLAGS** training materials are easy to use, ensure a cleaner plant and help you minimize your NRs.
